

RESEARCH REVIEW APPLICATION

Please use clear, concise, and non-technical language in completing this application.

Section A: Project Identification

Project Title:

Research Team:

Is NCC leading the project?

Yes

No

If no, please explain who is leading the research, and why:

Provide information on all members of research team in the following table:

Name	Role in Project (Lead researcher, co-investigator, student, etc.)	Position and Department	Affiliation / Institution	Contact Information (email, phone number, address)

Timeline:

Anticipated start and end dates for data collection:

Anticipated date for returning research results to NCC/NunatuKavut communities for review:

Other approvals:

Reminder: NCC needs to be involved before approval is sought from other authorities. Provide a list of ethics review approvals, permits, and other relevant approvals (required and received). *Attach any documentation in Section G.*

Section B: Research Partnership and Funding

NunatuKavut partnership and community engagement:

Which NCC research priority does this research address?

How did the research team involve NCC and NunatuKavut communities in developing the research? How were NunatuKavut communities engaged? (Include names, communities, and timeline.)

Funding:

Describe research funding, including sources and amounts.

Section C: Project Description**Project purpose:**

Describe research goals, rationale, and questions.

Project location:

List communities or describe location of research. *Attach map, if needed, in Section G.*

Research methods:

Describe methods and research activities. *Attach any research protocols, including interview guides, surveys, etc., in Section G.*

Describe how NCC staff, NunatuKavut Inuit, and/or a local steering committee will be involved in planning, guiding, and conducting research activities.

Research participants:

If the research involves human participants, describe the recruitment process, who will be recruited, and how they will be involved. *Attach consent forms and recruitment materials in Section G.*

Research analysis:

How will the data will be analyzed?

Who will be interpreting the data and verifying the results? Describe the involvement of NCC staff or NunatuKavut Inuit in research interpretation.

Section D: Benefits and Risks

Benefits:

Describe how the research will provide training, education, employment, and/or other opportunities for NunatuKavut Inuit.

What are other potential benefits of the research for NunatuKavut individuals and communities?

Risks:

Describe any potential harms, risks, or hidden costs to participants, communities, or the environment from the research, including risks due to publication. What steps will be taken to mitigate harm?

Section E: Data Ownership and Access

How will the research data be stored and kept secure during the research project? Who will have access to the data?

What provisions will be made for the long-term storage and access to research data after the project ends?

Section F: Deliverables and Dissemination

Describe the deliverables of the research.

How will these deliverables be shared with NunatuKavut participants and communities for their review before dissemination?

How will publications and presentations acknowledge NunatuKavut involvement in the research (co-authorship, etc.)?

Section G: Documentation

Attach all associated documents, as applicable, including:

- Research ethics approvals
- Archaeology permits
- Maps of research locations
- Support letters
- Recruitment materials
- Consent forms
- Interview guide
- Research protocols
